

SAMPLE RESEARCH BRIEF

Reinforcement of the Army

L26D-ENS08 / STARLIGHT RARE / LEGENDARY MODERN DECKS 2026

EXACT PRICE NOT ESTABLISHED

Executive finding

This is a bonus-slot Starlight upgrade tied to one of six possible bonus cards in its Deck, not an ordinary booster pull. The release mechanism is verified. The upgrade odds and a trustworthy exact-print market price are not published.

VERIFIED

Exact identity
The official card database lists Reinforcement of the Army as L26D-ENS08, Starlight Rare, inside the Legendary Modern Decks 2026 bonus-card group.

VERIFIED

Release mechanism
Konami says each of the three 55-card Decks includes a bonus 56th card: one of six cards from that Deck, normally Secret Rare, with a chance to upgrade to Starlight Rare.

UNKNOWN

Two decision-grade gaps
Konami does not publish the Starlight upgrade odds. The structured set-price source does not establish an exact market price for this printing.

Research scope

This sample verifies the object and its release story. A personal retain, reallocate, or revisit lean also requires the owner's condition, cost basis, time horizon, and named alternative.

Research file

What the exact object tells us

VERIFIED

Game role

The official database lists the card as Limited. Its effect searches a Level 4 or lower Warrior from the Deck, explaining its long-running utility across Warrior strategies.

VERIFIED

A second premium printing exists

The official database also lists a later RA05-EN113 Starlight Rare printing. The Starlight label alone does not make the L26D copy unique; release method and artwork still matter.

INFERENCE

Scarcity quality

The bonus-slot upgrade creates a stronger collector story than a standard rarity label. Its true scarcity cannot be quantified until upgrade odds, population data, or sustained exact sales appear.

INFERENCE

Attention path

The most credible breakout path is collector discovery: a recognizable staple, alternate art, and an unusual premium release. This is one input, not the whole decision.

Research conclusion

Treat L26D-ENS08 as its own object. Do not substitute the ordinary card's price, another Starlight printing, or a broad card-name average.

Decision frame

What supports each side

RETAIN CASE

- Verified bonus-slot Starlight release.
- Exact alternate-art identity is recoverable.
- Recognizable staple with durable game history.

REALLOCATE CASE

- Exact completed-sale evidence is missing.
- Upgrade odds are unpublished.
- Another Starlight printing now exists.

RESEARCH LEAN: REVISIT AFTER EXACT SALE OR POPULATION EVIDENCE

What would change the lean

A verified exact sale, a reliable grading-population count tied to L26D-ENS08, or published upgrade odds would materially improve the decision. Broad Reinforcement prices do not.
